

Tackling Productivity Challenges with X1 Search

A recent McKinsey report highlights that employees spend 1.8 hours every day—9.3 hours per week, on average—searching and gathering information. That’s a pretty significant amount of time in a workweek.

The IDC highlights that the knowledge worker spends about 2.5 hours per day, or roughly 30% of a workday, searching for information.

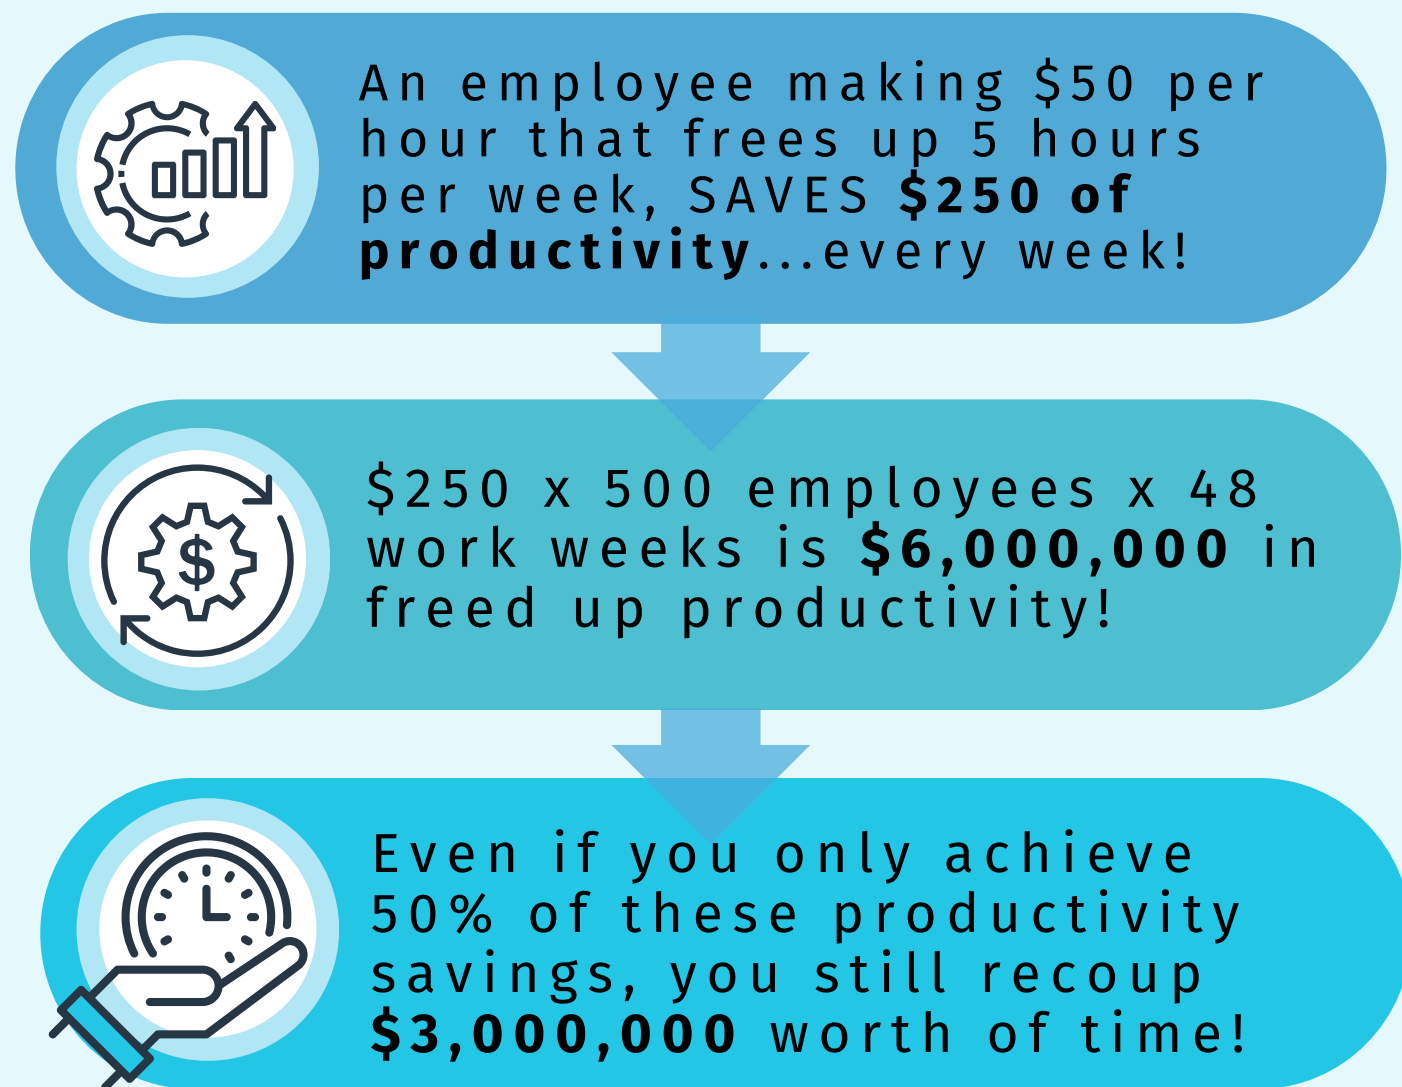

X1 Search solves the challenge of endless searching for information with an easy-to-use desktop productivity solution that enables you to instantly search and find the exact information you need across all your data sources (Outlook, Teams, OneDrive, Desktop, Gmail, Google Suite), in a single search, saving you hours a day.

X1 Search At-A-Glance

With X1 Search, users can **search and find** any email, chat, file, document and more across all your data sources. Highlights include the ability to:

- Access support for over 500 file types for comprehensive content indexing
- Perform complex search queries using Boolean operators, proximity searches, and wildcards
- Utilize robust, extensive filtering capabilities all within a single, easy-to-use interface
- Engage the power of X1's patented fast-as-you-type search technology to find exactly what you need

Savings Impact Using X1 Search

 List price for a single user license of X1 Search is \$79 annually. Volume discounts may apply.
