X1's Enterprise eDiscovery Solutions Integrate Directly into RelativityOne for a Streamlined Data Collection Experience

With the direct integration of X1's enterprise eDiscovery collection solution, X1 Distributed Discovery™, and now X1's cloud-based solution, X1E Remote Collection On-Demand into Relativity's SaaS platform, RelativityOne, organizations are empowered with the ability to rapidly search across and collect from up to thousands of endpoints within hours, dramatically increasing speed to review of on-premise or cloud-based data into RelativityOne. This fully integrated solution provides organizations with immediate pre-collection visibility into their data, targeted and efficient search and collection, eliminating the need for expensive and cumbersome ESI processing tools.

X1's Enterprise on-premise and on-demand solutions and RelativityOne provide the flexibility that law firm, corporate and consulting partners need to address multiple cases at diverse volume levels consistently and effectively. The combined solution offers a more consistent and performant user experience to customers across the globe – taking the time needed for document review from days or weeks to within minutes of collection.

"The ability to collect directly from custodian laptops and desktops into a RelativityOne workspace without impacting custodians is a game-changer. The ability to reduce collection times from weeks to hours so that attorneys can quickly begin reviewing and analyzing ESI in RelativityOne will drastically expedite eDiscovery workflows, saving time and money."

Marc Zamsky
President & COO of Compliance DS

X1 Enterprise Workflow On-Demand   **X1**

Search Criteria Defined | Instructions Sent to Custodian Laptops | In-place at the Office / In-place at Home / In-place at a Coffee Shop | Containerized Results are Sent to the Enterprise Manager | Reporting Across All Custodians | Export into RelativityOne® or Relativity® Server for Review

Key Benefits of the X1 and Relativity Integration

Immediate Visibility at the Endpoint
Gain instant visibility into the end-users data on the laptop or desktop before collection. Pre-collection visibility prevents the user from over collecting, allowing a more precise collection of only the data you need, saving both time and money.

Bypass Costly Collections
With collection fully integrated into review, speed to review rapidly accelerates. The user's critical data goes directly from custodian desktop or laptop straight to your reviewer's hands. No more unexpected delays and cumbersome processes.

Blazingly Fast Search Technology
With X1's patented and proven search technology, you can rapidly search across thousands of distributed endpoints in minutes, with precision and accuracy. No more time wasted endlessly searching through unstructured data prior to collection.

Rapidly Reduce Processing Time
Streamlined ESI collections are directly uploaded into RelativityOne, bypassing processing and data transfer steps and saving you time.

Dramatically Increased Speed to Review
Review collected data directly in RelativityOne within minutes and get instant insight into your data.
